

Crosslink Technology Inc.  
Epoxies, Urethanes • Custom Cast Parts

# Adhesives & Bonding

## CLS 9420

- Exceptional at bonding to oily metals
- One-component system
- Ability to snap cure

## XHD 2707 / XR6 2706

- High peel strength system made for bonding metal to abrasive stones
- Superior thermal cycling endurance
- Meets UL94-V0
- Can bond a wide variety of substrates

## XRD 2141 / XH9 2142

- Excellent for bonding Aluminum
- Room Temperature Cure
- Convenient 2:1 mix ratio

## XPB 2208 / CLI 4478

- Anti-oxidizing and Hexane Resistant
- Flexible bonding of filter media
- Moisture resistant
- High Thermal Shock Resistance
- 95A Shore Hardness

## CLR 1390 / CLH 6025

- Great for bonding materials with large CTE differential
- Long Pot life
- Exceptional water resistance
- Flexible
