

Blaze Fighter®

A cost-effective protection against brush fires

Blaze Fighter® is an easy to use intumescent product for the protection of wood structures against damage from brush fires.

It is applied by utilizing an air driven dispense gun or simply brushing it on.

A photograph showing a line of utility poles stretching into the distance against a bright orange sunset sky. The poles are silhouetted against the light.

A cost-effective way to prolong the life of utility poles.

The product is suitable for application to:

- ✓ Electric Utility Poles
- ✓ Telephone Poles
- ✓ Wood Fences
- ✓ All types of wood structures

Because the product was designed to provide effective protection in a short period of time after application, it is suitable for use in emergency situations.

Features

- Simple and clean to apply
- Effective within 10 - 15 minutes after application (for emergency situations)
- Easy-to-use spray applicator with attachments
- Minimal or no surface preparation required
- Long-lasting and UV resistant
- May be applied in a wide range of temperatures
- Compatible with currently used pole treatments
- Excellent shelf life
- Gaffable after full cure
- No heavy containers to carry to the job site
- No spillage from improperly sealed containers

Pecker Patch® Utility Pole Repair

Is an easy to apply polyurethane compound specifically developed to repair wood utility poles damaged by woodpeckers, insects or rot.

If woodpecker damage is costing your utility thousands of dollars in pole replacements, contact us today for a safe, quick and easy to use pole repair compound.

Features

- Gaffable after cure (safety issue)
- Minimize/eliminate leakage through common exterior cavities
- Fills voids and bonds to cavity walls
- Quick and easy dispensing (gun included)
- Moisture will not inhibit cure
- Designed to accommodate pole flexing without cracking or creating stress points
- Non-nutrient to fungi
- Wide range of application temperatures
- Proven service record since 2002
- Does not get hot when mixed and burn hands

- ✓ Partially used cartridges can be saved by removing the old mix head and re-capping the bottom opening of the cartridge
- ✓ The cartridges are suitable for use in a variety of dispense guns as follows:
 - Manual (requires much less force than a regular caulking gun)
 - Cordless (battery operated)
- ✓ Cartridges are 800ml x 800ml
